Profile

As a self-taught Full Stack Developer with a strong foundation in both front-end and back-end technologies, I bring a versatile blend of technical expertise and problem-solving skills to build scalable, user-centric applications. My core skills include designing responsive user interfaces, developing robust server-side logic, working with databases, and integrating APIs to deliver end-to-end solutions. With experience across the full development lifecycle, I create applications that are not only technically sound but also aligned with business goals and performance requirements. I am seeking a role where I can leverage my full stack expertise to build innovative digital products, improve system efficiency, and contribute to projects that drive meaningful user engagement and business growth.

Skills

Hard Skills

JavaScript (ES6+), HTML, CSS, React.js, Node.js, Express.js, SQL, Prisma, TypeScript, MongoDB, Rest APIs, JSON, Git, GitHub, Responsive Web Design.

Soft Skills

- *Time Management & Organization* – demonstrated through consistently meeting tight deadlines and managing multiple priorities simultaneously.
- *Creative Problem Solving* – applied in developing innovative solutions to streamline processes and improve outcomes.
- *Team Collaboration* – proven in cross-functional teamwork and successful group project execution.
- *Adaptability* – shown by effectively adjusting to shifting priorities and dynamic work environments.

Projects

Taskora – Smart Productivity Engine | Ironhack Bootcamp

MongoDB | Express | React | Node.js

- Developed a full-stack MERN application to help users organize and prioritize tasks efficiently, implementing secure JWT authentication, CRUD project management, and status/priority filtering.
- Designed a responsive dashboard with dark/light mode toggle and project overview, improving navigation and usability across devices.
- Optimized backend APIs, database queries, and reusable React components, resulting in smoother performance and enhanced user productivity.

I'm Hungry – Full-Stack Recipe Platform | Ironhack Bootcamp

React | Vite | JavaScript (ES6+) | HTML | CSS

- Developed a full CRUD recipe platform allowing users to create, view, update, and delete recipes, while implementing persistent user profiles and favorites functionality to personalize the experience.
- Implemented paginated browsing, responsive design, and reusable React components, ensuring smooth navigation and accessibility across devices.
- Enhanced front-end and back-end integration through optimized API calls and state management, improving performance and increasing user engagement.

Personal Portfolio – Developer Showcase | Personal Project

HTML | CSS | JavaScript (ES6+)

- Designed and developed a fully responsive personal portfolio website to showcase my skills, experience, and projects as a Full Stack Developer, addressing the challenge of presenting technical work clearly and professionally.

- Implemented modern UI elements, smooth scrolling, interactive project cards, and a "Quiet Luxury" aesthetic with custom theming, improving user engagement and navigation clarity.
- Optimized layout and performance across devices, ensuring fast load times, accessibility, and a consistent visual experience, enhancing overall site usability and professional presentation.

Velvet Rue – Beauty E-Commerce Platform | Personal Project

React | Node.js | Vite | JavaScript (ES6+)

- Designed and developed a full-stack beauty e-commerce platform to provide a seamless shopping experience for customers, implementing secure authentication for both customer and admin portals.
- Built a dynamic product catalog with advanced filtering, sorting, and search capabilities, along with a smart cart and wishlist using persistent state management, improving user engagement and shopping efficiency.
- Implemented a comprehensive admin dashboard for real-time analytics, order processing, and inventory management, enabling smooth backend operations and enhancing business workflow.

Education

Web Development Bootcamp | 2025 - 2026

IronHack

Completed an intensive Full Stack Web Development bootcamp at Ironhack, gaining hands-on experience building responsive, full-stack applications using modern JavaScript technologies, RESTful APIs, authentication, and database management, following industry best practices and agile workflows.

Professional Experience

08/2022 – 03/2025
Manchester, United Kingdom

Sales Assistant

H&M

- Managed 50+ daily customer interactions, resolving inquiries and complaints efficiently while delivering a positive client experience, strengthening communication and client-facing skills.
- Collaborated with a team of 10+ colleagues to consistently achieve store sales targets, demonstrating teamwork, adaptability, and performance-driven execution in a fast-paced environment.
- Maintained inventory accuracy and processed high-volume transactions with precision, applying analytical thinking and attention to detail to ensure data accuracy and operational efficiency.
